

BeWELL Bulletin

Innovative Cutting Edge health care device from Germany which you must have

Non-invasive · Painless · Non-medicinal · No side effects

BeWELL Laser Device, is an innovative, high-tech health care product originally developed and now introduced from Germany. It releases 650nm low level laser, which is easy to carry and apply. It offers therapy that is non-invasive, painless, non-medicinal and with no side-effects. Regular use of this device will improve red blood cell function and microcirculation. It acts by instantly increasing erythrocyte deformability, inhibiting the aggregation of erythrocytes and platelets, reducing blood viscosity and increasing the oxygen-transporting capacity of the red blood cells. Moreover, low level laser has been shown to promote the process of anti-oxidation and improve immune function.

Using BeWELL Device daily can help effectively control blood pressure and alleviate the side-effects of lipid-lowering drugs. It also enhances the activity of insulin receptors and improves insulin function in diabetic patients. Not only can it restore blood's beta-endorphin levels, it can also completely prevent symptoms of premenstrual syndrome. It is especially effective in preventing and improving conditions like coronary heart disease, stroke, hypertension, hyperlipidemia, diabetes, pre-menstrual syndrome (PMS) and other common city ailments. In addition, this device is effective in relieving and preventing various sub-health symptoms which include headache, dizziness, tinnitus, insomnia, nasal allergies, dry throat, skin allergies, back pain, anxiety, depression, and other mood disorders. Allergies, dry throat, skin allergies, back pain, anxiety, depression, bad mood, etc.

Visit - BeWELL Center

One-stop Health Counseling Services

BeWELL Centre is the flagship service centre of BeWELL Global. It is also the base we use for establishing and implementing our concepts in promoting health. BeWELL Global pioneers the introduction and distribution of BeWELL Device from Germany. We work closely with internationally regarded medical experts and professionals to introduce alternatives to the medical world.

At BeWELL Center, our certified medical personnel and professionals can offer you a free blood cells analysis and professional health advice. Moreover, you can experience our wonderful BeWELL Device – low level laser therapy for 30 minutes

The Discovery of Low Level Laser

Low level laser was discovered in 1967 by Dr Endre Mester in Semmelweis University in Hungary Budapest of Germany. Dr Endre Mester originally intended to find out if laser could cause cancer. During the experiment, he used mice in his study. After shaving the hair of the mice, he divided them into two groups, one group was under low level laser irradiation, while the other group in the normal environment. Finally he came to the amazing finding – the group with low level laser irradiation did not develop cancer. Furthermore, the hair of the mice in this group grew faster and more vigorously. This is how the "Low Level Laser Therapy" was discovered.

Dr Endre Mester
The father of laser therapy

Innovative Device Express

Every treatment takes only 30 minutes.
It is easy to carry and use.

Hand-held device: mini-size, handy and user-friendly with comfortable finger rest positions in the back of the device. The 650 nm low level laser will penetrate through the skin and reach the red blood cells within the blood capillaries.

Intranasal device: when the 650 nm low level laser irradiates the nasal mucous membranes, it reaches the red blood cells inside the capillaries. It is a marvelous device for the prevention of cerebral vascular diseases.

Use for 30 minutes Use for 30 days Use for 3 months Persistent Use

Toxicity and metabolic waste in the blood begin to reduce, the blood circulation is enhanced, and oxygen-transport ability of the red blood cell is improved.

The metabolic function begins to improve, disorders like general headache, dizziness, palpitations, insomnia, hand and foot paralysis have improved significantly or even disappear.

Blood pressure, blood sugar and blood lipid gradually goes back to normal, the blood circulation becomes smooth and the body functions are maximized.

You will feel energetic and refreshed by persistent use of BeWELL Device. It will also improve your immunity without getting cold easily and fever frequently. Most of all, it prevents cardio-cerebrovascular diseases.

Light of Life

650 nm Low level laser

The output wavelength of laser is the prerequisite to determine the quality of it. High level laser can destroy all the military facilities including nuclear weapons. And it is known as "the restricted area of life" in the military field. However, if we control the output wavelength of laser to a standard value of 650nm by the semiconductor emitter, then we will have the low level laser.

Medical scientists have called the low level laser as "Light of Life" because it will not cause injury to human tissue. On the contrary, it facilitates a series of photochemical reactions and biological effects to the blood, cells, and tissue of the body.

Who should receive this naturopathic treatment of low level laser therapy?

Hypertension

- Hyperlipidemia
- High blood sugar
- Hyperviscosity
- Atherosclerosis
- Coronary Heart Disease (CHD)
- Cerebral embolism / Stroke
- Post stroke complications

Obesity / dizziness

- Headache / angina
- Vision deterioration
- Memory deterioration
- Unclear mind
- Gastrointestinal problems
- Poor digestion

Maintain good general health

- Improve sleeping quality
- Nasal allergy / snoring
- Detox beauty treatment
- Premenstrual Syndrome
- Emotional distress
- Fatigue and weak
- Poor immunity

Are you taking
medicine, or poison ? ? ?

For any patients, taking medicine is an unavoidable fact. The frequent intake of the same medicine can cause drugs to lose its resistance and effectiveness. So patients have no choice but are forced to change their medicine frequently. Most often, they find their liver and kidney functions got harmed and health condition turns worse. Although taking western medicine can have immediate effect, it also brings permanent damage to the body due to medicine deposition and drug resistance. Worse of all, the damage cannot be eradicated. All the drugs and medicine have toxicity to some extent, so persistent use of drugs and medicine will harm your stomach, liver, kidney, and intestines. Thus, taking medicine is similar to taking poison! It is necessary to take medicine for the acute condition for long term illness but we cannot let the side effect of medicine take our life instead of curing it.

Good News

With only HK \$6 , money for a newspaper per day, BeWell Device brings health to your family and friends.

6 Core Benefits of 650 nm Low Level Laser

- Cleans the blood and lowers blood lipids
- Prevents thrombosis and promotes thrombolysis • Softens blood vessels
- Regulates blood pressure bi-directionally
- Maintains healthy brain and healthy lung • Improves cardiac function
- Boosts body immunity • Improves Sub-health conditions
- Enhances blood circulation • Increases metabolism

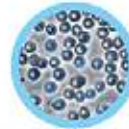

Know your health through blood cells analysis.

Many people have underestimated the importance of healthy blood. If you can keep the blood healthy with good circulation, it will benefit your health. Moreover, healthy blood can prevent and reduce the complications of cardiovascular disease, diabetes and all the common city ailments.

BeWell Center, located in Wanchai, Hong Kong, provides blood cells analysis. The professional staff will take a drop of blood from your finger, and place it under the microscope, so the screen will show you a blood picture. Through this test, as well as the professional explanation from the consultants, you will know your health condition. Then, try using BeWell Device 650 nm low level laser for 30 minutes, and repeat the blood cell analysis. You will see that the conditions of the red blood cells have significantly improved: more active, better shape, greater ability of carrying oxygen and faster blood flow.

Generally, for city people, their red blood cells stick together from one to ten cells. Thus, the red blood cells cannot function well with low flow rate and poor ability of carrying oxygen. As a result, our main organs will be lack of oxygen and nutrients.

After using BeWell Device for 30 minutes, you will clearly see red blood cells been separated and moves smoothly, with adequate energy and oxygen.

"Energy and persistence
Conquer all things."

Benjamin Franklin

Must-have health device for diabetes

Diabetes has 2 types, type I and type II. Type I diabetes is mostly congenital, with loss of insulin secretion and inability to create insulin to meet the requirement of the body; patients with type I diabetes require insulin injections to sustain life.

As for the type II diabetes, it is the most common one, accounting for 90-95% of the diabetes patients. The mechanism of type II diabetes is generally as following: the sensitivity of the body to insulin decreases, the activity of insulin receptors in the membrane decreases, unable to accept insulin for glucose metabolism and leading to increase of blood glucose.

For diabetes, it is imperative to enhance the quantity and activity of insulin receptor which will then actively improve the status of high blood viscosity, increase deformability of red blood cell, and minimize the diabetes complications.

Besides medication, diabetes can use the BeWell Device to increase the activity of the insulin receptor, so as to help the insulin to be received by the receptors normally, enter the cells for glucose metabolism, and improve the conditions of the high blood sugar effectively. In addition, the low level laser can help red blood cells to scatter independently (by restoring the ability of negative charges which attract each other), improve deformation capacity and reduce blood viscosity which directly reducing the occurrence of various serious complications. Therefore, BeWell Device is the best choice for those with diabetes.

Can ladies get rid of various discomforts such as emotional distress and distending feeling during menstruation?

Pre-Menstrual Syndrome (PMS) which starts seven to ten days before menstruation sometimes cause a series of periodic physical and psychological discomforts including four categories:

Physiological - breast swelling and pain, edema, weight gain, insomnia, fatigue

Psychological - anxiety, depression, anger, tension, restlessness

Behavioral - lethargy, indulgence in sweet food, poor performance in working, less social activities

Cognitive - difficult to concentrate on working, poor memory

The above symptoms are mainly due to the lower B-EP level (endogenous opioid peptides) during the Luteal phase comparing with Follicular phase. Just before and after ovulation, the B-EP level (lower than the normal value) will reduce in the blood. BeWell Device can increase levels of B-EP in blood, ease moodiness, reduce blood viscosity, improve blood flow, reduce blood stasis and blockage, increase the formation of natural endorphins in the brain, improve microcirculation, reduce menstrual pain and premenstrual syndrome.

Why can't blood pressure be lowered to normal ? Is there any chance to stop taking the cardiovascular drugs ?

Many patients with hypertension only concern about stabilizing their blood pressure, but never know that the root cause of the high blood pressure lies in the lesions of the blood and vessels. Long-term intake of fat, cholesterol, drugs and other residues build up in the blood which form the blood waste, contaminating the blood and hardening the vessels. These residues adhere to the blood and hardening vessels like porridge, with poor mobility, leading to the increase of blood pressure. The antihypertensive drugs alleviate the symptoms of hypertension, but not grasping the root causes of the disease. Therefore, it will inevitably lead to unstable blood pressure.

In addition, drugs for cardiovascular disease cannot always prevent the deterioration of diseases. And there is no way to guarantee that patients will recover or the disease will not recur. Long-term medication will lead to drug resistance such as drug efficacy reduce or even ineffectiveness. Therefore, the patients must change the drugs, leading to a never-ending vicious circle! Actually, patients can have other options rather than medication!

By using BeWell Device, 650 nm low level laser, the patients can start with regulating the blood health and focusing on the origin of the cardiovascular and cerebrovascular diseases. Such as lowering the blood viscosity, clearing the blood vessels and increasing the oxygen-transporting ability of the red blood cell. As for hypertension, coronary heart disease, stroke and other illnesses, BeWell Device not only alleviates their symptoms, but also removes the root causes of the disease!

Questions & Answers

Q: Can I share one unit of BeWell Device with other family members?

A: Of course you can! The whole family can use one BeWell Device at different times.

Q: Can everyone use BeWell Device?

A: Everyone can use it, except for those with pacemaker or have difficulty in blood coagulation.

Q: How many times should we use BeWell Device per day?

A: Twice is enough for promoting health; once in the morning and once in the evening. For certain kinds of diseases, it can be more than two times. Please consult our health professionals at BeWell Centre.

Q: Do we need to use BeWell Device for long term?

A: Persistent use can promote health, so the body can stay at its best condition all the time.

Q: Is there any side effect with 650 nm low level laser : BeWell Device ?

A: No. The energy released by this low level laser can be well absorbed by the body. The radiation power of the device can only penetrate the skin, tissues, blood vessels and never causing any harm to human cells.

Q: Why do we use the device for 30 minutes each time?

A: Because each cycle of the blood circulation in the body is approximately 7-8 minutes. For 30 minutes, the blood can complete 4 cycles, and this is enough to maintain the low level laser to be effective in the body for up to 8-12 hours.

Q: Why are there 2 types of BeWell Devices, hand-held and intranasal device?

A: BeWell Device is to improve the blood and vessels. The intranasal device mainly targets the blood and vessels in the brain. It is most beneficial for those with stroke and memory loss. Hand-held device focuses more on the blood and vessels in the heart. Thus, it is most beneficial for those with coronary heart disease and angina pectoris.

Actually, you can choose according to your needs. For merely promoting general health, the handheld device is more convenient.

Q: Is there any adverse or side effects if using BeWell Device while taking drugs?

A: No. BeWell Device has no side effects, and does not have conflict with any drugs.

Q: When is the best time to use BeWell Device ?

A: You can use it anytime. But for preventing ischemic heart and brain disease, it is better to use it after dinner or 2 hours before sleep. Please consult BeWell advisor for further information.

Q: Is there any after sale services provided for BeWell Device?

A: We provide a comprehensive warranty for three years. Moreover, we also provide free blood test every three months in order to know the health progress of our customers.

Q: Is BeWell Device operated by batteries?

A: BeWell Device has a chargeable battery inside. And it takes 1.5 hours for each charge. The fully charged BeWell Device can be used at least 5 times.

Testimonials of BeWell Device Users

I have had hypertension, mental stress, insomnia and other physical disorders for many years. I went to Detroit Center with an attitude of giving it a try. Then I bought a hand-held and an intranasal device for myself. After one year, my doctor told me that my blood pressure was back to a normal state and advised me to take fewer drugs. Then all the anti-depressant medicines were stopped and my sleeping problems have gone completely as well. What's more, I lost 10 pounds! Thank you BeWell for being so helpful!

I had insomnia for many years, I tried different methods, but didn't have any improvement. After using the BeWell Device for 4 months which was recommended by my friend, my sleeping problem has greatly improved. I have quality sleep with fewer dreams and I seldom wake up during the night. I am more energetic during day time. Thank you BeWell Global and all the staffs.

Frankly speaking, I was doubtful about the device at the beginning. But after using it for 20 minutes and followed with a blood cells analysis, I know it really works. Then I bought one and used it to bat an hour everyday or even more. Recently, my wife mentioned that my sleeping sound had reduced quite obviously. Most importantly, my brain works faster now! Thank you BeWell Device, it really makes me younger!

I used to have linitus, headache and dizziness, which had bothered me for over ten years. Because of a friend's recommendation, I bought a hand-held device from BeWell Centre for improving health. After 2 weeks, there were significant improvement for my linitus and dizziness. Then I found I have good sleep every night. I also applied the nasal device, it relaxes my neck muscle and my headache had gone as well. Thank You BeWell!

Sharing of using Low Level Laser Device by Law Wai-yan

I was diagnosed with diabetes and hypertension by end of 2008. Then I continuously felt dizzy for 4-5 months. It was getting worse that I could not concentrate on doing anything and was not able to go anywhere alone. In July 2009, I learnt that the low level laser therapy can enhance blood circulation and specifically for those with diabetes and hypertension. After using the Device for half a month, my dizziness had gradually gone. Furthermore, I used to wake up frequently and I have difficulty to get back to sleep, but now I can have at least a minimum of 3 to 5 hours' deep sleep every night.

BeWell Device has granted me clear mind, fast and accurate response! — Elton Loo
