

What kind of people and patients are not suitable to use German made BeWell Device?

Patients with vascular purpura, thrombocytopenic purpura, hemophilia, hereditary or acquired blood coagulation disorder are not suitable to use German made BeWell Device.

Women who are preparing pregnancy, currently pregnant or in feeding period, should they use German made BeWell Device?

For mothers who are currently pregnant or in feeding period, if they are diagnosed with pregnancy-induced hypertension syndrome or hyperviscosity syndrome, they can use German made BeWell Device to lower blood viscosity, blood pressure, and to prevent microcirculation disturbances in uterus and placenta.

For women who are preparing pregnancy or mothers who are in their early pregnancy stage will have different pregnancy related reactions and discomforts, therefore it is best to avoid using German made BeWell Device.

Does German made BeWell Device cause dependency? If I stop using this device, will there be any abnormal reactions?

No. No abnormal reactions will occur if you stop using German made BeWell Device, but the former high blood viscosity condition may re-emerge.

It has been proved in clinical research that by using German made BeWell Device helps to improve Na^+/K^+ -ATPase pumps activity in RBCs. If you stop using this device, it will only make this supplemental health effect disappear without causing dependence.
